## Summary

I have more than 20 years of experience in computing and information technology. I have had the opportunity to work in all areas of this market, from developer to sales.

I went through several companies, of all sizes and billings. I can highlight my passages through Datasul, Sercompe and NeoGrid, where I built a career. I highlight my work at NeoGrid, working together with the team that transformed the company into a multinational with presence in more than 35 countries.

By appropriating the terms of the startups community, I pivoted my career by joining ContaAzul, being the first SRE, when there was not yet the term SRE. I had the opportunity to launch the infrastructure bases that allowed the company to grow.

But the main highlight of my career was helping to create, as the founder of JetBov, a management platform for the productive chain of bovine animal protein. For 4 years, we have created one of the biggest highlights in the AgriTech market and certainly the market leader in the livestock management segment. I did my exit in 2018 when I sold my stocks finishing my mission at JetBov.

I continue to help companies acting as SRI/Dev in several markets, but now I am focused in deliver NLP solutions as feasible product at Totvs.

Colleagues know me as a smart colleague who can always be trusted to always ask for help. But I know that rather than just helping, it's teaching others to help each other, teaching them to do their activities better, helping them to achieve their goals as long as it does not affect my results. I can work well alone, but my best is working with others.

## Experience

### TOTVS Labs Team Lead and Product Owner

#### TOTVS Labs

Sep 2021 - Present (6 months +)

Create new architecture for data storage and query for Carol ecosystem, cutting costs and increase speed and availability

Manage the workflow and team tasks keeping a constant flow of deliverables

Create awesome Python algorithms to serve Data Analysis to Carol Customers

Work in implement and maintain the CI/CD process, helping team to increase and maintain code quality

### TOTVS Labs Team Lead, Senior Python Engineer for NLP Products

#### TOTVS Labs

Feb 2020 - Sep 2020 (8 months)

Create new Python architecture for NLP products for Carol ecosystem in 3 months, from zero to 5 paid customers.

Build a new workflow for our CI/CD process using GitHub with Zero Downtime deploys  
Identify team goals and evaluate team progress  
Created a new architecture that provides NLP APIs and chatbot features with 100% availability last year  
Helped the team to maintain test coverage rate over 85% and introducing new automated tests technologies  
Manage team workflow using Agile Methodology

## **Business Mentor**

Sebrae Santa Catarina

Apr 2018 - Present (3 years 11 months +)

Mentor at the product management workshop of the Sebrae SC startups training program, Startup SC.

Act as Project Leader on IT Infrastructure projects  
Aided implement ITIL Best Practices on Application Support Services Management  
Perform IT Consulting to other NeoGrid Teams

## **Product Manager**

Datasul Tecnologia

Oct 2006 - Aug 2007 (11 months)

Defining new products  
Gathering market requirements  
Building product roadmaps, particularly Technology roadmaps  
Product Life Cycle considerations  
Product differentiation  
Product positioning and outbound messaging  
Promoting the product externally with press, customers, and partners  
Bringing new products to market

Monitoring the competition

### **IT Consultant**

Sercompe Computadores Ltda

Aug 2000 - Oct 2005 (5 years 3 months)

Design network projects (specially with Cisco and HP devices)

Implement and support Cisco devices, Microsoft Server Software

Evaluate the ROI of designed projects

### **Support Analyst**

Datasul S.A.

Oct 1996 - Aug 2000 (3 years 11 months)

as a part of helpdesk staff

internal tools development (visual basic 6)

high level support (about +- 40 windows servers and 20 hp pa risc servers)

## **Education**

### **UDESC Joinville**

Master's degree, Applied Computer Science

2013 - Present

Started as a guest student on UDESC master degree on Applied Computer Science program.

### **INPG**

MBA, Leadership and Business Administration

2003 - 2006

### **Associação Catarinense de Ensino**

Bachelor of Applied Science (B.A.Sc.), Computer Science

1996 - 2001

### **Escola Técnica Tupy**

Tecnico, Processamento de Dados

1993 - 1996

## **Licenses & Certifications**

**Microsoft Certified Professional - Prometric**

**Amazon Cloud Professional 1 star - Amazon Web Services (AWS)**

Issued Dec 2013 - Expires Dec 2015

**Amazon Cloud Professional Cloud Security 1 start - Amazon Web Services (AWS)**

Issued Dec 2013 - Expires Dec 2015

 **MCPS: Microsoft Certified Professional** - Microsoft  
1113206

## **Skills**

Python • JavaScript • Agile Project Management • Cloud Computing • EDI • Android Development •  
Project Management • Systems Analysis • Scrum • IT Strategy

## **Honors & Awards**

 **Finalista Inovativa Brasil 2015** - Inovativa Brasil - Ministério do Desenvolvimento e  
Industria, Governo Federal  
Nov 2015
